

~~CONFIDENTIAL~~

## FUNCTIONS, PSYCHIATRIC DIVISION, MO

1. Establish, maintain, and develop a psychiatric program, including prevention, consultation, treatment, and research.
2. Develop and maintain criteria and standards for screening and selection in order to eliminate situations where the development of emotional disorders will prevent effective service or create security risks.
3. Determine the emotional stability of applicants and employees in the light of the general environment and mission of the Agency and recommend acceptance or rejection of applicants, or, retention or release of employees.
4. Perform detailed diagnosis as required; establish a method of control with respect to psychiatric diagnosis and treatment performed outside the MO; provide therapy; and provide for disposition of psychiatric cases arising within the Agency.
5. Consult and advise with officials and other personnel to provide assistance in personnel and personality problems and make available to operating officials of the Agency psychiatric information designed to be of assistance in carrying out their missions.
6. Perform basic research with particular reference to psychiatric aspects of the selection and assessment of personnel and to those aspects of psychiatry important in intelligence work.
7. Prepare appropriate reports and maintain necessary records.
